

maritime Reorganization of container alliances favourable to HAROPA PORT

The new cooperation strategies are taking shape in 2025 for the benefit of Le Havre. Two weekly services will be introduced on the Asia-Europe trade.

Enhanced competitiveness

Le Havre is doing well thanks to the reorganisation of the Asia-Europe trade by the new alliances, including PREMIER ALLIANCE/MSC.

The **total number of services will increase to seven in 2025**, with **two additional import/export services** compared with September 2024.

Improved transit times

This reorganisation will also **reduce transit times** to/from Le Havre and Asia on the services offered: 6 days less on average.

These new services are in addition to the competitive services and transit times of the world's leading alliance, OCEAN ALLIANCE. They enable HAROPA PORT to strengthen its maritime offering for the benefit of its French and Western European customers.
