

Sénalia, a key actor in port logistics for cereals, is developing its storage service offering in Rouen

Sénalia is helping underpin the economic development of the Seine axis with a fivefold increase in its capacity to store packaged goods and provision of the associated logistics services.

A rapidly expanding logistics service offering

- ▶ **3 warehouses (HUB 1, HUB 2 & HUB 3), equipped with sprinkler systems and in ideal locations** adjacent to the container terminals and river and road transport routes (A13)
- ▶ **A total area of 75,000 sq. m.** - rack and bulk storage
- ▶ **All packaging types:** pallets 80*120/100/120 - Big Bags
- IBC / GRV - packages - outside
- ▶ **Controlled temperature, privatisable cells, BREAM 3* green label, ICPE 1510-1530-2662-2663, ISO 22 000, OEA "S"**

This expansion of warehousing and logistics service activity is additional to Sénalia's historical expertise, opening the way to new markets with tailored, integrated solutions:

Port logistics

Helping goods circulate
between regions and between the
Seine Axis river and maritime
domains

Agroindustrial bulk logistics

Directing bulk goods flows
upstream and downstream in
the supply chains of
agroindustrial sites

Warehousing and logistics services

**Storing, preparing and
organizing flows of packaged
products**
