

## Sourcing notice for the development of a port site in Honfleur

**HAROPA PORT is arranging discussions with business operators with a view to developing a port facility in Honfleur, intended to serve activities relating to the energy transition and decarbonization.**

The intention of HAROPA PORT is to consult economic actors and industrial firms in a number of sectors - most notably offshore wind energy, construction, decarbonization and energy transition – that are likely to be interested in the site's development and operation.

**Objective: to gather information on opinions and requirements to ensure informed future decisions on development of the site.**

►► The site in Honfleur, approximately 50 ha in area, has a strategic location at the mouth of the Seine. It offers major maritime capacity due to its waterside location in the immediate vicinity of the port terminal.
